

Product Information

dermorganics® Glycerin

Certified organic glycerol

Cosmetic raw material from organic origin

Basic solvent

Skin hydrating

for natural and organic cosmetics

Organic status certified by ECOCERT

dermorganics®

The product line

dermorganics® products are cosmetic ingredients based on vegetable building blocks from organic agriculture. The ingredients are chosen and tailored according to the needs of modern natural cosmetic formulations. In the evolutionary process of the growing natural cosmetics market, there is an increasing demand for organic ingredients. This is a logical consequence of the philosophy behind natural cosmetics, i.e. to produce environmentally sound products with the lowest possible impact on nature. Organic ingredients are GMO-free and the plants are cultivated without using pesticides or synthetic fertilizers. The **dermorganics®** range will contain basic ingredients for natural cosmetics and biocosmetics such as:

- solvents, hydrating agents
- functional oil components
- emulsifiers
- specialties

dermorganics®
cover many cosmetic
functions

dermorganics® Glycerin

This ingredient is pharma grade glycerol with +98% purity from organic sources. It is produced from soy, corn, sustainable palm or coconut oil. The high purity makes it easily possible to replace commonly sourced glycerol with **dermorganics® Glycerin** for the production of biocosmetics with a high content of certified organic material.

dermorganics®
Glycerin is organic
glycerol with high
purity

Application

Since the chemical identity of **dermorganics® Glycerin** is not different to conventional glycerol the exchange is easy and straightforward. If other grades of glycerol are used (like technical grades with a certain water content) the right amount of **dermorganics® Glycerin** has to be calculated and the corresponding proportion of water has to be added.

dermorganics®
combine the
formulator's demand
for functionality and
organic sourcing

Characteristics of dermorganics® Glycerin	
Appearance	Colourless liquid of high viscosity
INCI	Glycerin
Recommended dosage	0,0-20 %
Regulatory status	Registered in EU, US, Japan
Organic certification	By ECOCERT

dermorganics®

**Dozens of formulation
examples are
compiled in our
Formulary**

Many formulations with our products are available for traditional as well as for natural cosmetics concepts. Please contact us to receive your copy of latest Formulary Edition or check our website at <http://www.dr-straetmans.de>.

Packing units

dermorganics® Glycerin available in 25 kg canisters, 250 kg drums and 1250 kg containers.

Environmental Information

dermorganics® Glycerin produced in an environmentally unobjectionable process from 100% regrowing materials and is readily biodegradable. **dermorganics® Glycerin** has not been tested on animals.

Handling and storage

In closed original containers **dermorganics® Glycerin** can be stored for at least 3 years. It does not need to be preserved.
