

## Product Information

**dermosoft® Pentiol eco****The Product: dermosoft® Pentiol eco**

**dermosoft® Pentiol eco** is derived from vegetable sources and represents a sustainable and natural cosmetics compliant alternative to the well-known petrochemical quality of Pentylene Glycol. It is identical in its multifunctional efficacy and convenience in handling.

**CHARACTERISTICS**

- INCI: Pentylene Glycol
- Appearance: Colourless, clear liquid
- Odor: odorless or faint
- 100% naturally derived, already ECOCERT/COSMOS approved and compliant with other standards for natural cosmetics (please contact us for further information)
- Sustainable origin: Made from non-food parts of corn (cobs) and sugar cane (bagasse)

## Cosmetic properties:

- Skin conditioning and solvent properties according to COSIng Database
- Improvement of pigment dispersion
- Enhancement of emulsification
- Sensory modifier (reduces tackiness)
- Low destabilization effect on emulsions
- Unlimited water solubility and soluble in polar ester oils
- Suitable for all types of cosmetic products
- Broadband antimicrobial activity, especially against gram negative bacteria
- pH independent
- Can be used alone or in combination with multifunctional additives and preservatives

**DOSAGE**

Product Concept	Dosage
Emulsions	1.0 – 3.0 % + co-active used alone: 5.0 %*
Surfactant and aqueous based product	3.0 – 5.0 %*

\*do not exceed 4 % for eye care and sensitive skin products

**ANTIMICROBIAL EFFICACY**

Gram +	Gram –	Yeast	Mould
++	++	++	+

Legend: + = good, but needs a co-active | ++ = very good alone

## MANUFACTURING PROCEDURE (LABORATORY SCALE)

### How to work with dermosoft® Pentiol eco

- Incorporation in emulsions
- Add **dermosoft® Pentiol eco** to the water or oil phase, preferably before emulsification process
- Can be added at the end of manufacturing process, too
- Suitable for hot or cold process
- **dermosoft® Pentiol eco** has a low impact on emulsion stability

Hot or cold  
process  
possible

### Incorporation into surfactant based products

- Dissolve **dermosoft® Pentiol eco** directly into the concentrated surfactant base
- Higher concentrations (> 4%) may have an influence on the viscosity

Ideal for  
transparent  
products

### Incorporation into aqueous solutions

- Dissolve **dermosoft® Pentiol eco** directly into water (unlimited water solubility).

## FORMULATION ADVICE

Compatibility	Surfactants
	UV-filters
	Lecithin, phospholipids
	Cosmetic oils
	Perfumes
	Active ingredients
Suitable combinations for antimicrobial efficacy	In emulsions: combination with organic acids (e.g. <b>dermosoft® 1388 eco</b> )

## APPLICATION IDEAS

Perfectly suitable for higher pH levels, liquid and transparent products, suitable for natural cosmetics.

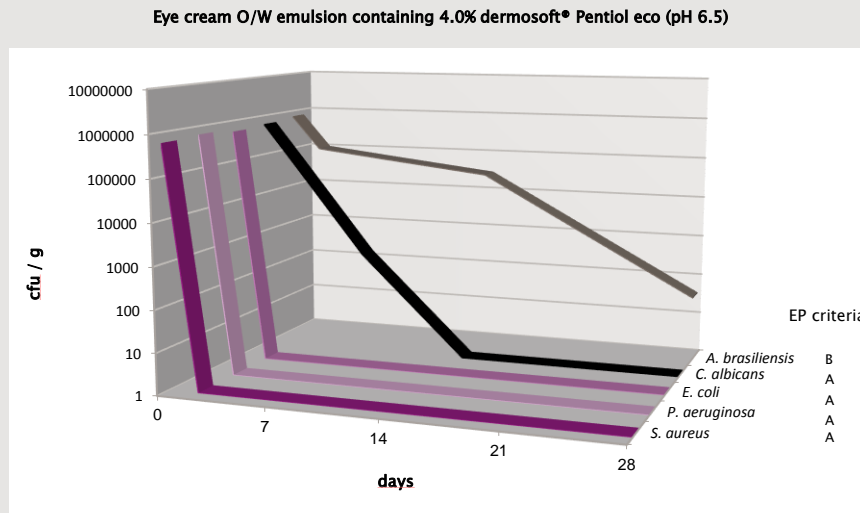

For more formulation ideas visit us at:

<https://www.dr-straetmans.de/en/products/>

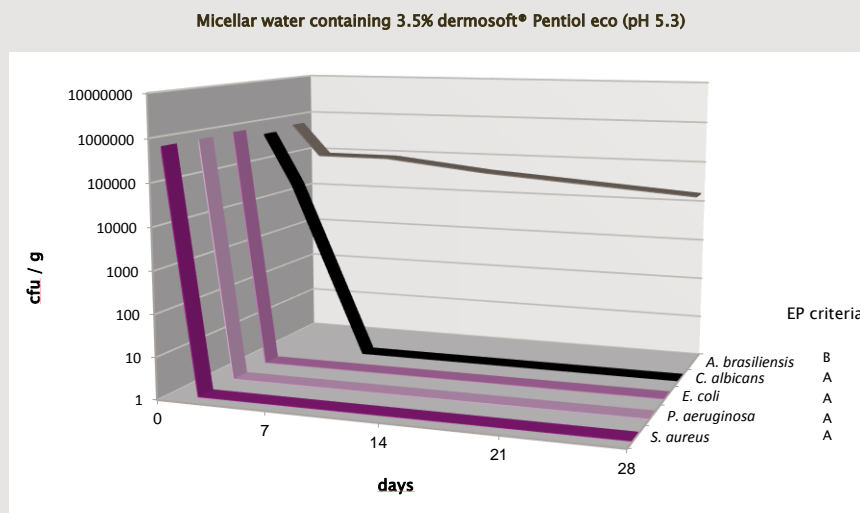

## Proof of Performance

### MICROBIOLOGICAL CHALLENGE TESTS

Used alone in emulsions at higher pH

Used alone in aqueous product

## Boosting activity with organic acids

Basic emulsion containing 3.5% dermosoft® 1388 eco (pH 5.3)

Basic emulsion containing 3.5% dermosoft® 1388 eco + dermosoft® Pentiol eco (pH 5.4)

## TRADE INFORMATION

<b>International Approval*</b>	EU, USA, Canada, Australia, China, Japan, Korea
<b>Packaging</b>	5 kg / 25 kg
<b>Shelf life (stored in original container)</b>	24 months
